HELP IS ONLY A BUTTON CLICK AWAY

The V.ALRT is a wearable help button that can be carried discreetly in a pocket or a bag, worn on the wrist, or around the neck as a pendant. The V.ALRT uses Bluetooth® SMART technology in association with a mobile application, to initiate calls and text messages from a smartphone. With the push of the V.ALRT help button, your smartphone sends a personalized text message and GPS location to up to three pre-selected contacts.

WATERPROOF, LIFEPROOF

The V.ALRT Personal Alert Button is IP67 Compliant. This means the V.ALRT can go where ever you go. Whether that is outdoors, to the pool, or even to the shower or bathtub

ANDROID & IOS COMPATIBLE

The V.ALRT works with iPhone 4S/iOS 7 or newer and any smartphone using Android 4.3 or newer with Bluetooth 4.0.

NO CHARGING NEEDED

The V.ALRT has up to one year of battery life and powered by a standard CR2032 watch battery. The battery is removable and replaceable by the user.

OUT OF RANGE NOTIFICATION

If the V.ALRT device travels out-of-range from the smartphone, both devices will receive an audio notification.

NO MONTHLY FEES

Since the V.ALRT operates through your smartphone, all of the features are available without any monthly service fees.

FALL DETECTION

The user can turn on Fall Detection to enable the alert to be sent automatically after a 60 second countdown.

GPS LOCATION

In addition to the alert text messages and phone calls, the location from your smartphone will be sent to your emergency contacts.

TEXT AND CALL

After pressing the button, the V.ALRT transmits a command to your smartphone to send a text message to your preset contacts, followed by phone calls. This alert behavior is completely customizable.

WIRELESS RANGE

The V.ALRT must be within range of your smartphone to operate. It has a wireless range of up to 75' indoor or up to 300' outdoor using Bluetooth 4.0.
